4th Symposium on Industrial use of Thermodynamics (JE-IUT) - A WCCE10 Joint Event

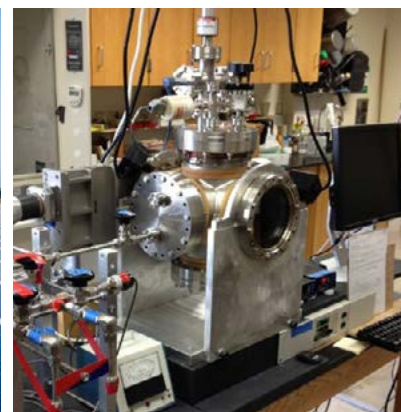

This Symposium promoting synergies between industrial and academic research will be the 4th edition of its series launched at the InMoTher (Industrial use of Molecular Thermodynamics) that was held in Lyon, France, in March 2012, the 2nd edition was held in Eindhoven at ESAT 2014 and the 3th one in Nice under the frameworks of ECCE10

The objective of this joint event is to trigger innovation by encouraging on joint industry-academic collaboration. The proposed event wants to be an opportunity for practicing engineers to be in close contact with the most recent scientific developments in the area of Thermodynamics. The symposium will therefore include some keynotes-tutorials on the selection of reliable data and adequate models for sustainable process and product design. A round-table discussion in collaboration with the "Fluid Separation" working party is planned.

IUT is organized as a joint event of WCCE10 in collaboration with:
